Scorecard Part 1 Guidelines - Clinic Staff Interview

Table 1. Obtain clinic service statistics

- 1.1. Obtain total male and female clients presenting to health facility in the last quarter (last 90 days from date of interview). Record the exact dates of the 3 months corresponding to the data indicated. For example, May 1-July 31, 2007.
- 1.2 Of the total clients above, document the number of maternal health clients (MHC)
- 1.3 Of the total clients in 1.1 above, document the number of children under the age of 5 years (U5 children)
- 1.4 Check the appropriate box indicating the source of the health service statistics: medical records (either paper- or electronic-based records), or via some other source. If other source, please specify in space provided.

Table 2. Interview two (2) health care providers in the clinic about the supportive supervision they received from their immediate supervisor in the past month. *[Note: these questions are intended to solicit information on clinic supervision, not to measure Hanan 'supervision visits']*. Inform providers that all information they provide will be held in strict confidence and that individual responses will never be discussed with anyone.

2.1 Individually, ask each of the two (2) health care providers whether s/he has received supervision in the past month (past 30 days from date of interview).

If the answer to 2.1 is "No", skip to Scorecard Part 2: Medical Record Review.

2.2 Ask provider if s/he was given feedback from the supervisor during the last supervision.

2.3 Ask provider if supervisor reviewed medical records with the provider during last supervision.

2.4 Ask whether supervisor used any supervisory tools or aides during last supervision such as checklists, protocols, scorecard tools, or any other tool.
